# Summary of Key Facts Regarding the Revised New York State Department of Health (NYSDOH) Immunization Requirements for the 2014-2015 School Year

### **General Info**

- NYSDOH regulations now follow the Advisory Committee for Immunization Practices (ACIP) recommended immunization guidelines for those immunizations required by Public Health Law 2164. ACIP is composed of medical and public health experts who develop recommendations on how to use vaccines to control diseases in the US, and they are responsible for making vaccine recommendations to the Center for Disease Control and Prevention (CDC).
- The new immunization requirements for school entrance/attendance go into effect July 1, 2014. **Note:** July 1, 2014 is the beginning of the 2014-15 school year.
- District administrators and private providers have been informed of the changes.
- Electronic health records, the New York State Immunization Information System (NYSIIS) and the Citywide Immunization Registry (CIR) automatically compare entered vaccines against what has been programed as required for a given age, grade, timing of administration or number of vaccines in a series. We recommend you contact your health office software vendor to inform them of these changes effective as of July 1, 2014, to make sure that your software is updated to meet the NYS Requirements.

#### Vaccine Specific Info

- Students in grades K and 6<sup>th</sup> will need 2 varicella vaccines, and may need an additional dose of IPV. (Students in grades 1–5 and 7-12 are not required to have additional doses of these vaccines).
- Students no longer need 2 doses of MMR to enter kindergarten unless they are 7 years of age or older. Per NYSDOH regulations and ACIP Guidelines, a 2<sup>nd</sup> dose of MMR is required by age 7.
- Students in grades pre-K-6<sup>th</sup> may need additional doses of DTP/DTaP if under age 7, or Tdap/Td if 7 years of age and older.
- There are no changes for grades 7-12.
- Serologic evidence is now acceptable for Polio as well as MMR, Hep B and Varicella. For Polio, antibodies must include all three serotypes to be accepted as proof of immunity.
- Medical exemptions to immunizations must be reissued annually; and must specify the immunization exempted, sufficient information to identify the medical contraindication to the specific immunization, and specify the length of time the immunization is medically contraindicated. A sample medical exemption form is available at: <u>http://www.health.ny.gov/forms/doh-5077.pdf</u>

## NYSDOH Vaccine and Dose Change and Dose Intervals Information for the 2014-2015 School Year

Pre-Kindergarten Students					
Vaccine	Vaccine What is needed for 2014 How has this changed from 20				
DTP	4 doses	Previously needed 3 doses			
DTaP		(NYC has always required 4 doses)			
HIB	1-4 doses	Dosing addressed in more detail			
PCV	1-4 doses	Dosing addressed in more detail			

Kindergarten Students					
Vaccine	What is needed for 2014	How has this changed from 2013			
DTP	4 -5 doses	Previously needed 3 doses			
DTaP		(NYC has always required 4 doses)			
Polio	3-4 doses	Previously needed 3 doses			
MMR	1 dose	Previously needed 2 doses of Measles,			
Mumps- Measles-Rubella		but only 1 dose of Mumps and Rubella			
Varicella	2 doses	Previously needed 1 dose			

Grades 1-5 Students				
Vaccine What is needed for 2014 How has this changed from 2				
DTP	4 -5 doses	Previously needed 3 doses		
DTaP		(NYC has always required 4 doses)		

Grade 6 Students					
Vaccine	How has this changed from 2013				
Varicella	2 doses	Previously needed 1 dose			
IPV-OPV (Polio)	3-4 doses	Previously needed 3 doses			

Dosing Intervals for Vaccines						
Vaccine	Minimum age	Dose #1 to	Dose #2 to	Dose #3 to	Dose #4 to	
	Dose #1	Dose #2	Dose #3	Dose #4	Dose #5	
(DTaP/DTP)	birth	4 weeks	4 weeks	6 mos	6 mos <sup>1</sup>	
younger than age 7*						
*For students 7-10 years of age not fully immunized	7 years of age Tdap	4 weeks Td {used if additional dose(s) required}	4 weeks Td{used if additional dose(s) required}	N/A	N/A	
Tdap/Td is given			- ·	2		
IPV	6 weeks of age	4 weeks	4 weeks	8 weeks <sup>2</sup>	N/A	
MMR	12 mos of age <sup>3</sup>	4 weeks <sup>4</sup>	N/A	N/A	N/A	
Varicella	12 mos of age	3 mos⁵	N/A	N/A	N/A	
Hib	6 weeks of age	See ACIP <sup>6</sup>	See ACIP	See ACIP	N/A	
Pneumococcal	6 weeks of age	See DOH chart <sup>7</sup>	See DOH chart	See DOH chart	N/A

#### Footnotes for Dosing Intervals for Vaccines

<sup>6</sup> See ACIP chart for specifics on intervals - <u>ACIP</u> - <u>Advisory Committee on Immunization Practices</u>

Additional resources which will help clarify these requirements include:

- <u>NYSDOH Pneumococcal Vaccine Schedule</u>
- NYSDOH Tdap Questions & Answers from the New York State Department of Health
- US Vaccines list which identifies vaccine brands and components
- <u>New York Statewide School Health Services Center Website Immunization Page</u>

<sup>&</sup>lt;sup>1</sup> DTaP/DTP - 5<sup>th</sup> dose not required if 4<sup>th</sup> dose given at 4 years of age and older

 $<sup>^{2}</sup>$  IPV - For students 4 years of age and older who have not received a 4<sup>th</sup> dose, 3 doses are sufficient. For students who received OPV and IPV in the series, a total of 4 doses are required regardless of age.

<sup>&</sup>lt;sup>3</sup> MMR- In certain circumstances a dose may be given at an earlier age, check with your regional immunization bureau for such students <sup>4</sup> MMR - Students 7 years of age and older must have 2 doses of measles and mumps containing vaccine and, at least, 1 dose of rubella containing vaccine.

<sup>&</sup>lt;sup>5</sup> Varicella - 4 weeks interval between doses if student 13 years of age and older.
