[Back to main page](#)

3. A pop up window appears with the option to make your image whatever size you wish. For most pictures, choose a size of 250 to 600 pixels wide. Then click the Submit button and your image will automatically resize to your desired size. This process cannot be undone. If it's too small, just upload your original image again and choose another size. If it's still too large you can always make it smaller.

Select images to resize

New width : <input type="text" value="75"/> <small>(height will be calculated automatically)</small>		(lancer.gif) Current size: width: 150 X height: 172
<input type="button" value="Submit"/>
