Preparing for a New School Year at Big Picture

We are excited to start the new school year. We will be welcoming 15 LaFayette students to our 9th grade or 101 Advisory! The Big Picture Staff has spent the summer reflecting on the previous school year and planning for this one. We are currently setting attendance and academic goals for our students.

In July, Jessica Giordano, Greg Scott, Rosalie Whipple, Susan Osborn, David Stablein and Susan Johnson (SUNY Morrisville CSTEP Director) attended the Big Picture International Conference on Student Centered Learning. We all learned so much from the conference and had time to plan as a team on what to bring back to our school. Additionally in August, the entire Big Picture staff were able to use professional development hours to explore questions, such as: What do we value? Where are we? Where do we need to go?

We will be welcoming our entire school community to the 2018-2019 school year at our Welcome Back Potluck Dinner on September 11th, at 6pm. We hope you will join us!

Summer STEP

LaFayette students participated in the joint SUNY Morrisville STEP and OCC Liberty Partnership Summer Program. Students participated in five weeks of projects, field trips, and college visits. Students built rockets, RC cars, solar ovens, ships, and collaborated with SUNY Morrisville professors in the Agricultural and Biology/Chemistry Departments. Students also had the opportunity to explore their drawing and illustration interests with Big Picture graduate and current Rhode Island School of Design student, Nick Park. These students concluded their efforts with an art show of their collected work.

Morrisville STEP will continue throughout the school year. To learn more about how your student can participate in activities, contact David Stablein at 315-504-1002, or email dstablein@lafayetteschools.org.
